# XEOMA VIDEO SURVEILLANCE SOFTWARE

Introduction

Inspired by children's playset toys, Xeoma allows to build your PERFECT video surveillance system by combining blocks of functionality.

Go ahead, play around — enjoy your video surveillance.

- 99% of camera models are supported (ONVIF, MJPEG, H.264, H.265, Fisheye, WiFi, PTZ, audio, etc.)

- Works on Windows, Linux, Linux/ARM (Raspberry), Mac OS X, iOS and Android.

- User-friendly interface – simple to work with!

- AI-based functionality (face, license plates, emotions, color, object, sound recognition and many other things)

WWW.XEOMA.COM

XEOMA's innovative interface

Xeoma's main advantage is its innovative interface based on construction-set principle.

Easy for non-tech savvies, powerful for professionals, it allows to build both small and enterprise-level systems with truly unlimited number of cameras (up to several thousands cameras on a single computer).

Combine Xeoma modules and create your own perfect video surveillance system.

XEOMA VERSIONS

- **Free version:** up to 1000 cameras for preview, up to 3 modules per chain, limited functionality. Doesn't accept remote connections. Settings are kept. No ads, no license needed. No restrictions on the time of use.

- **Trial version** (Demo version): unlimited amount of cameras, full set of features and modules, remote connections and user profiles available. No ads, no watermark. Settings are reset within 8 hours. Archive retention - 1 hour.

- **Commercial version** (Pro, Standard, Lite and Starter editions): unlimited amount of cameras (depends on the purchased license), features and modules for any budget and task. Licenses are for lifetime (1-time purchase). Free remote access through P2P. AI-based features available.

FREE REBRANDING

Xeoma offers a free customization and rebranding tool for OEM/ODM.

By means of the rebranding utility your customized Xeoma can change UI design, logo, modules' icons, have a different name, your company's address, support business hours, links to your site, set of modules and features, etc. Change Xeoma to your taste!

You'll be able to change the URLs, make changes into archive's work, activation, connection. Add/delete features, interface elements, and modules according to your goals. It's in your power to make the program great and extra comfortable for your users!

Use your rebranded Xeoma version and its full potential to earn more.

White label customization is also available.

XEOMA CLOUD

- Perfect solution for the off-site data storage
- No equipment required, no maintenance needed - everything
- Connect cameras (even without static IP address), connect, view, download

- Can be used with desktop Xeoma
- No hidden costs or additional payments: what you see is what you get!
- Monthly subscriptions starting from $0.75/month for 1 cam
