XEOMA PRO YOUR CLOUD

Your Cloud - your rules!

XEOMA.COM

Keeping you safe since 2004

Xeoma PRO

YOUR OWN CLOUD SERVICE

Have you ever thought about having a cloud service of your own?
Xeoma Pro Your Cloud is your own cloud service now!

Possibilities:

- *Unlimited* archive capacity (with possibility to limit users' disk space).
- *Support of 99%* of all cameras (can be set in config files).
- *Pro-features*: face recognition, privacy masking, object detector and more!

With **Xeoma Pro Your Cloud** you can create your own video surveillance as a service and decide on the terms of offering it to your subscribers at any price. Create as many users as you want and adjust their settings (individual/general). Make the service fully yours - use *free* rebranding.

Your Cloud

Be independent of any other services. Have the upper hand in managing your own cloud with Xeoma.

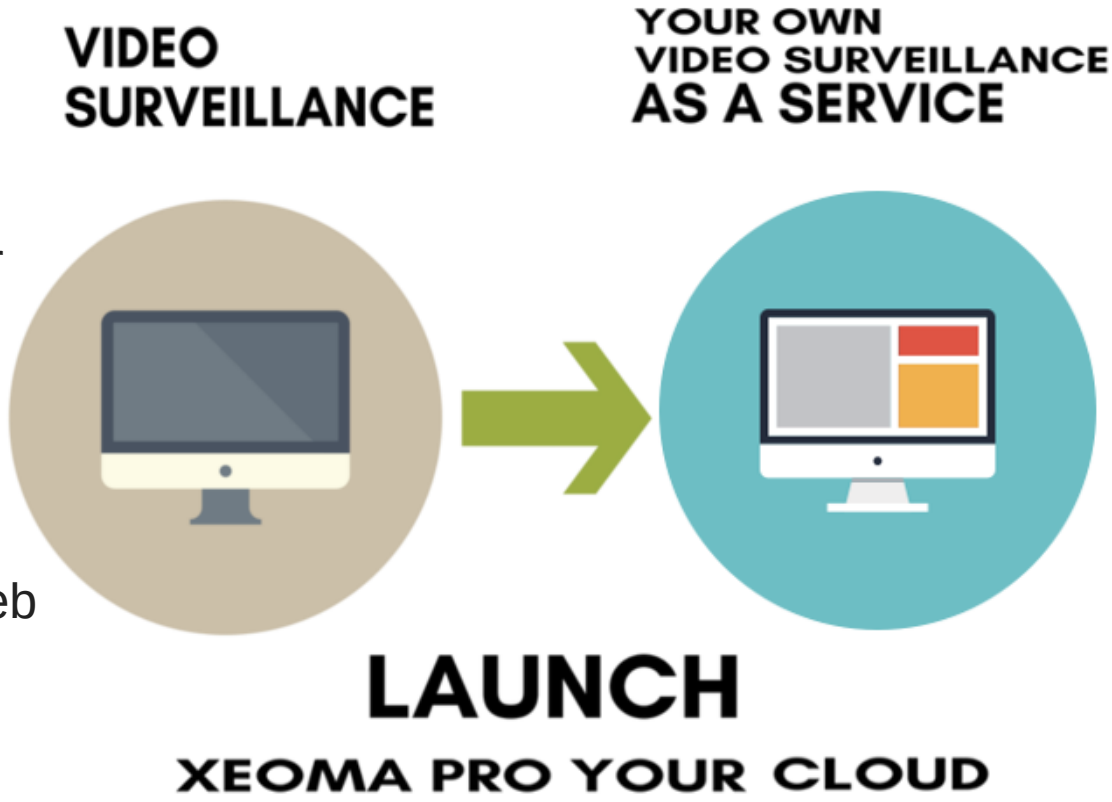
Your Rules

HOW TO START?

Follow these simple steps to create your own service.

GUI:

- Launch Xeoma Software
- Install Cloud server to autostart (Main Menu → Install)
- Create your users and configure their settings through web interface



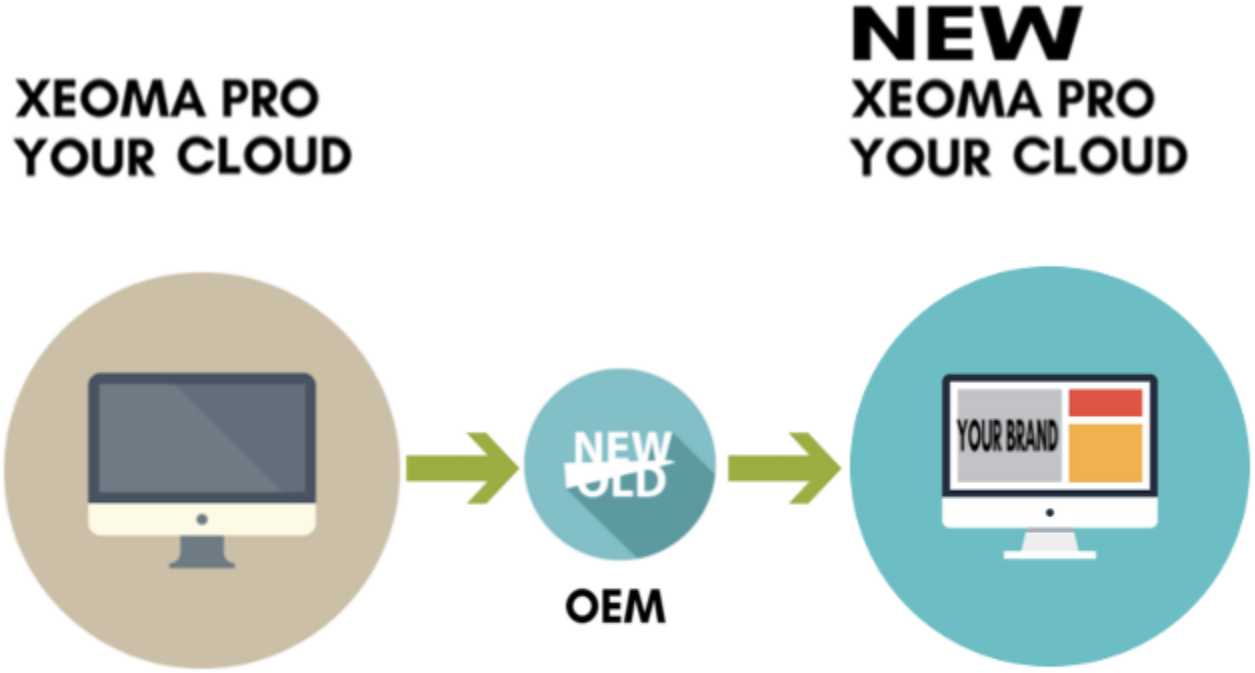
Console:

- Install Cloud server to autostart with the parameter *-install -cloudauto*
- Create users and configure their settings through configuration files

Selling your own Cloud video surveillance has never been so easy!

FREE REBRANDING

Help your subscribers remember and recognize your brand!
Use our free rebranding tool to provide *your* cloud service under *your* name.
Change the name, add your company's address, support business hours,
links to your site, etc.



CUSTOMIZATION

EASY CONNECTION

Wide choice and convenient options: your users will be able to connect to your Cloud Service via smartphone/tablet (Android, iOS), Xeoma client or web browser.

Number of the client and web browser connections is not limited and can be set in config files.

One Cloud - Multiple Options

WORK SCENARIOS

Work with Xeoma Pro Your Cloud can be easily carried out in 3 ways – through web interface, configuration files or through console.

INTEGRATION WITH BILLING

Full billing synchronization: users' subscriptions will be added, deleted or extended automatically.

BILLING SYNCHRONIZATION

For integration with your billing, you can use our script template or your own utility.
